## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. Authorization for this Examiner's amendment was given in a telephone interview with Applicant's Attorney (Mr. Brian L. Klock with registration # 36,570), on Wednesday September 19, 2007, without traverse.

3. In claim 18, line 4, after function insert ---  $f(r) = \cos(a \log |r| + c)$  ---.

## **Drawings**

4. The drawings were received on September 12, 2003. The Examiner accepts these drawings.

## **Reasons for Allowance**

5. Based on applicant's arguments (pages 13-15) filed on August 10, 2007, with respect to claims 1-25 have been fully considered and are persuasive. As a result the art rejection of claims 1-8, 14-17 and 19-22 have been withdrawn. Therefore, claims 1-23 are allowable.

6. The following is an examiner's statement of reasons for allowance.

The prior art of record fails to teach or suggest mark embedding and detection using projective transforms comprises (a) calculating a 1-D correlation between the each projective transform and said basis function and finding one or more peaks of said correlation, wherein the position of each of said peaks provides spatial parameters of one of said one or more embedded patterns in combination into other features and elements of claims 1,2,14,15 and 19; (b) multiplying the resampled transformed image with the transform of said basis function along radial lines to create a first result; inverse transforming said first result to the space domain using a one-dimensional transform to create a second result and finding one or more peaks of said second result, wherein the position of each of said peaks provides the spatial parameters of one of said one or more embedded patterns in combination into other features and elements of claims 7,16 and 21; (c) finding peaks of said correlation, each peak corresponding with one of said embedded patterns; and determining said transformations from the positions of said peaks and said parameters of said patterns embedded into said second image. in combination into other features and elements of claims 8, 17 and 22; (d) maintaining a basis function, said basis function being a substantially scale invariant one dimensional function excluding the function  $f(r) = \cos(\alpha \log |r| + c)$  wherein  $\alpha$  and  $c$  are constants in combination into other features and elements of claims 9, 18 and 23.

**7. Claims 1-23 are allowed.**

**8.** Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."

### **Citation of Relevant Prior Art**

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ratnakar (U. S. 6,556,688 B1) discloses watermarking random zero-mean patches for printer tracing.

Luna et al (U. S. 6,542,541 B1) disclose method and apparatus for decoding MPEG video signals using multiple data transfer units.

### **Contact Information**

10. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to ABOLFAZL TABATABAI whose telephone number is (571) 272-7458.

The Examiner can normally be reached on Monday through Friday from 9:30 a.m. to 7:30 p.m. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Bhavesh Mehta, can be reached at (571) 272-7453. The fax phone number for organization where this application or proceeding is assigned is (571) 273-8300.
